STAINLESS STEEL PRESSURE BANDS FOR CLAMPS

These special harmonic steel pressure bands are projected/manufactured to be used with the Euro.Rigan clamps (MP Series) to keep/assure the contact between brake shoes and brake lining during the assembly/bonding operation and the next curing process.

For the brake shoes projection, there are available special pressure bands with slit.

The length of pressure bands is on request. The width, starting since 20 mm grows (5 mm in 5 mm) until maximum of 90 mm. Extra sizes are on request
